EID Project

# **EID – BASELINE ANALYSIS TOOLKIT**

## Objective of the Baseline Analysis Toolkit:

- For proper planning and decision on a strategy for replication of the EID-Approach in Economic Zones, it is necessary to obtain basic information on the Eco-Zone, and identify hot-spots and core sectors for action.
- The baseline analysis toolkit provides a guideline and useful tools for the execution of this process.
- The baseline analysis focuses on the Economic Zone as core area; for some specific issues neighbouring Barangays are to be included.

## Scope of the Baseline Analysis:

- Relies as far as possible on already existing / available data
- Limits required work and duration
- Establishes a standard approach and provides comparable baseline data for later benchmarking of all Economic Zones launching EID-Initiatives

## Outputs of the Baseline Analysis:

- Establishes 5 Profiles characterizing the main features of the Economic Zone with regard to the EID approach
- Develops a Strategy for the EID-Initiative in the Economic Zone
- Establishes a Project Team with appropriate Management, Implementation and M&E Structures
- Elaborates a Plan of Operations for the EID-Initiative
